Standard Industrial Classification

Código SIC

It is the most accepted international system for business activity classification. Its use is still very widespread, not only in the US but also in the public administrations of many other countries.

It is important to know the different SIC codes due to its common use in official forms related to foreign trade procedures. The SIC code is still very used and is still considered to be the international standard to classify economic activities. This code appears in the heading of Informa D&B's International Reports.

The classification criteria of the SIC code system is based on the nature of the products or services offered by the companies.

In this table you can find the different specification levels of the activity so you can easily locate the SIC code you need.
